B) PAN DETAILS

As per SEBI Circular No. MRD/DoP/Cir- 05/2007 dated April 27, 2007, it is now mandatory that Permanent Account Number (PAN) issued by the Income Tax Department would be the sole identification number for all participants transacting in the securities market, irrespective of the amount of transaction. Accordingly investors will be required to furnish a copy of PAN together with the Application Form. Application Forms without these information and documents will be considered incomplete and are liable to be rejected without any reference to the investors. The procedure implemented by the AMC and the decisions taken by the AMC in this regard shall be deemed final.

C) DETAILS FOR COMPLIANCE WITH ANTI MONEY LAUNDERING REGULATIONS OF SEBI

Prevention of Money Laundering Act, the SEBI Circulars on Anti Money Laundering and the Client Identification implementation procedures prescribed by AMFI interalia require the AMC to verify the records of identity and address(es) of investors. To ensure adherence to these requirements, investors are required to approach Points of Service (POS) (list of POS available on amfiindia.com) appointed by any of the KYC Registration Agency and submit documents for completion of appropriate KYC checks. The details for KYC compliance can also be downloaded from AMFI website, www.amfiindia.com or website of the mutual fund, www.bandhanmutual.com. The Mutual Fund website also prescribes the list of documents that can be submitted by investors to the POS to get their KYC checks completed.

It is mandatory for all investors (including joint holders, NRIs, POA holders and guardians in the case of minors) to furnish such documents and information as may be required to comply with the Know Your Customers (KYC) policies under the AML Laws. Applications without such documents and information may be rejected.

In terms of SEBI circulars dated April 27, 2007, April 03, 2008 and June 30, 2008 read with SEBI letter dated June 25, 2007, Permanent Account Number (PAN) would be the sole identification number for all participants transacting in the securities market, irrespective of the amount of transaction, except (a) investors residing in the state of Sikkim; (b) Central Government, State Government, and the officials appointed by the courts e.g. Official liquidator, Court receiver etc. (under the category of Government) and (c) investors participating only in micro-pension. SEBI, in its subsequent letters dated June 19, 2009 and July 24, 2012 has conveyed that systematic investment plans (SIP) and lumpsum investments (both put together) per mutual fund up to ₹ 50,000/- per year per investor shall be exempted from the requirement of PAN. Accordingly, investments in Bandhan Mutual Fund (including SIP investment where the aggregate of SIP installments in a rolling 12 months period or in a financial year i.e April to March) of upto ₹ 50,000/- per investor per year shall be exempt from the requirement of PAN. However, eligible investors (including joint holders) should comply with the KYC requirement through registered KRA by submitting Photo Identification documents as proof of identification and the Proof of Address [self-attested by the investor / attested by the ARN Holder/AMFI distributor]. These exempted investors will have to quote the "PERN (PAN exempt KYC Ref No) in the application form. This exemption of PAN will be applicable only to investments by individuals (including NRIs but not PIOs), joint holders, Minors and Sole proprietary firms. PIOs, HUFs and other categories of investors will not be eligible for this exemption.

Thus, submission of PAN is mandatory for all other investors existing as well as prospective investors (except the ones mentioned above) (including all joint applicants/holders, guardians in case of minors, POA holders and NRIs but except for the categories mentioned above) for investing with mutual funds from this date. Investors are required to register their PAN with the Mutual Fund by providing the PAN card copy (along with the original for verification which will be returned across the counter). All investments without PAN (for all holders, including Guardians and POA holders) are liable to be rejected. Application Forms without quoting of PERN shall be considered incomplete and are liable to be rejected without any reference to the investors. The procedure implemented by the AMC and the decisions taken by the AMC in this regard shall be deemed final.

After completion of KYC compliance, investors need to approach KRA for Change of Address and not Registrar (CAMS). In respect of KYC compliant Folio, prospective Change of Address received along with transaction slip will not be processed by Registrar (CAMS). The AMC reserves the right to reject subscription requests in the absence of appropriate compliance with the AML Laws.

In line SEBI circular No. MIRSD/Cir-5/2012 dated April 13, 2012 and various other guidelines issued by SEBI on the procedural matters for KYC Compliances, the following additional provisions are applicable effective December 1, 2012:

 - V. If the commencement date is 15th December 2016 and if the investor provides the start date 1st January 2017, then capital appreciation for first trigger will be calculated between the commencement date (15th December 2016) and the investor's opted start date (1st January 2017)
 - a. For Monthly frequency the subsequent trigger date is 1st February 2017
 - b. For Quarterly Frequency the subsequent trigger date is 1st April 2017

14. The switch will be triggered only if the required minimum capital appreciation clause is achieved. If this is not the case as on the trigger date the switch for that respective month / quarter / half year / year will be skipped. There is no limitation on number of skips.
15. If any trigger is skipped for a particular frequency due to the appreciation amount being less than the minimum amount, the subsequent tracking of the capital appreciation will continue with the amount as on the last executed STP.
16. The calculation of capital appreciation will be done at a transaction level in the respective scheme and folio. For example: If the investor has opted for this facility (monthly frequency) and CAMS (Registrar and Transfer Agent) has registered the STP in their system on 1st January 2017. All subsequent lump sum purchases (including switch-ins) in the source scheme will be tracked from the date of purchase for a period till the next Cap STP date. If at an individual transaction level there has been a minimum appreciation of INR 500, then such a transaction will qualify for switch and accordingly the capital appreciation amount would be calculated and switched to the target scheme. For all qualifying transactions, the switch amount into the target scheme will be a single collective amount after adding transaction level appreciation for all qualifying transactions.

	<p>The asset allocation pattern indicated above may change for a short term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be rebalanced within 7 calendar days from the date of deviation and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time.</p>			
	<p>In the event of involuntary corporate action, the scheme shall dispose the security not forming part of the underlying index within 7 days from the date of allotment/ listing.</p>			
	<p>Portfolio Replication norms</p>			
	<p>Subject to Clause 3.6.7.2 of SEBI Master, any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.</p>			
Investment Strategy:	<p>Equity</p> <p>The Scheme will be managed passively with investments in stocks in a proportion to the weights of these stocks in the Nifty Alpha 50 Index. The investment strategy would revolve around reducing the tracking error to the least possible through rebalancing of the portfolio, considering the change in weights of stocks in the index as well as the incremental collections/redemptions from the Scheme.</p> <p>Please refer the Scheme Information Document (SID) of the Scheme for further details on Investment Strategy.</p>			

<p>Risk Profile of the Scheme & Risk Mitigation Factors</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <ul style="list-style-type: none"> The Scheme attempts to track the respective indices and it would invest in the securities included in its Underlying indices regardless of their investment merit. The Scheme may be affected by a general decline in the Indian markets. Performance of the Nifty Alpha 50 Index will have a direct bearing on the performance of the scheme. In the event the Nifty Alpha 50 Index is dissolved or is withdrawn by NSE Indices Limited (NSEIL) or is not published due to any reason whatsoever, the Trustee reserves the right to modify the respective scheme so as track a different and suitable index or to suspend tracking the Nifty Alpha 50 Index till such time it is dissolved / withdrawn or not published and appropriate intimation will be sent to the Unit holders of the scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the scheme will be subject to tracking errors during the intervening period. Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty Alpha 50 Index or one or more securities covered by / included in the Nifty Alpha 50 Index and may arise from a variety of factors including but not limited to, any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of Income Distribution cum capital withdrawal, etc. The Indices reflect the prices of securities at a point in time, which is the price at close of business day on National Stock Exchange of India Limited (NSE). The scheme however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trade may not be identical to the closing price of each scrip on that day on the NSE. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from NSE closing prices. NSEIL undertakes periodic reviews of the securities that are represented in the Nifty Alpha 50 Index and from time to time may exclude existing securities or include new ones. In such an event, the scheme will endeavor to reallocate its portfolio to mirror the changes. However, the reallocation process may not occur instantaneously and permit precise mirroring of the Nifty Alpha 50 Index during this period. The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index. Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees. Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to: circuit filters in the securities, liquidity and volatility in security prices. Due to the reasons mentioned above and other reasons that may arise, it is expected that the scheme may have a tracking error in the range of 2-3% per annum from the Benchmark. However, it needs to be clearly understood that the actual tracking error can be higher or lower than the range given. In case of investments in derivatives like index futures, the risk reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively new market. Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme(s) has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme(s) would invest as given in the scheme information document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated. Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate. Basis Risk (Interest - rate movement): During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio. Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favorably leading to fluctuation in the NAV. Liquidity Risk: Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time. Other Risk: In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments. <p>Please refer the Scheme Information Document (SID) of the Scheme for further details on Risk Profile of the Scheme.</p>

Risk Management Strategies (Contd.)	Risk associated with Debt Investment	
	Risk Description	Risk management strategy
	Credit Risk Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.	A traditional SWOT analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower.
	Reinvestment Risk This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.	Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.
	Risk associated with Equity investment	
	Risk Description	Risk management strategy
	Market Risk The scheme is vulnerable to movements in the prices of securities invested by the scheme, which could have a material bearing on the overall returns from the scheme. The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets.	Market risk is inherent to an equity scheme. Being a passively managed scheme, it will invest in the securities included in its Underlying Index.
	Liquidity risk The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.	The Scheme will try to maintain a proper assetliability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks
	Derivatives Risk As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that Investors should understand. Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.	The fund has provision for using derivative instruments for portfolio balancing purposes. Investments in derivative instruments will be used as per local (RBI and SEBI) regulatory guidelines. The fund will endeavor to maintain adequate controls to monitor the derivatives transactions entered into.
	Tracking Error risk (Volatility/ Concentration risk) The performance of the Scheme may not commensurate with the performance of the underlying Index viz. Nifty Alpha 50 Index Fund on any given day or over any given period.	Tracking Error risk (Volatility/ Concentration risk) Over a short to medium period, the Scheme may carry the risk of variance between portfolio composition and Benchmark. The objectives of the scheme are too closely track the performance of the Underlying Index over the same period, subject to tracking error. The Scheme would endeavor to maintain a low tracking error by actively aligning the portfolio in line with the Index.
Risks associated with money market investment		
Risk Description	Risk management strategy	
Market Risk / Interest Rate Risk As with all fixed income securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	The Scheme may invest in money market instruments having relatively shorter maturity thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities.	
Liquidity risk or Marketability Risk This refers to the ease with which a security can be sold at or near to its valuation yield-to maturity (YTM).	The Scheme may invest in money market instruments having relatively shorter maturity. While the liquidity risk for short maturity securities may be low, it may be high in case of medium to long maturity securities.	
Credit Risk Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).	Management analysis may be used for identifying company specific risks. Management's past track record may also be studied.	

Plans and Options	The Scheme has two Plans - Regular Plan & Direct Plan , with a common portfolio and separate NAVs. Each of the Plans offer Growth & Income Distribution cum capital withdrawal Option[^] . Income Distribution cum capital withdrawal Option (IDCW) under both the Plan(s) offer Payout of Income Distribution cum capital withdrawal option, Reinvestment of Income Distribution cum capital withdrawal option & Transfer of Income Distribution cum capital withdrawal option (from Equity Schemes to Debt Schemes Only). [^] the amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.
